1971 CENSUS OF CANADA

RECENSEMENT DU CANADA 1971

Population

MOTHER TONGUE

Population

LANGUE MATERNELLE

INTRODUCTION

This bulletin presents final population counts from the 1971 Census by mother tongue and sex. The mother tongue concept refers to the language a person first learned in childhood and still understands. In the case of infants, this refers to the language most often spoken at home.

Historical comparisons back to 1941 are shown for Canada in Table 17. All mother tongues for which separate figures are available from 1971 Census tabulations are given for Canada and the provinces in Table 18. The remaining tables show a less detailed classification for other types of areas — urban and rural, census divisions, municipalities of 10,000 population and over, census metropolitan areas, and other census agglomerations of 25,000 population and over.

Classifications of the population by mother tongue into three broad groups (English, French and all other) will be published for all municipal subdivisions and federal electoral districts in a special census report SP-3 (Catalogue No. 92-773). This report will identify those municipalities and electoral districts in which the minority language group constituted 10 per cent or more of the total population in 1971.

Geographic terms used in this report are defined for census purposes as follows:

Urban: Includes the population living in: (1) incorporated cities, towns and villages with a population of 1,000 or over; (2) unincorporated places of 1,000 or over having a population density of at least 1,000 per square mile; (3) the built-up fringes of (1) and (2) having a minimum population of 1,000 and a density of at least 1,000 per square mile.

Rural: Includes all the remaining population.

Urban size groups: Each municipality classed as urban in (1) and (2) above is allocated to a size group according to its population. However, each municipality (or part) lying within the urbanized core of a census metropolitan area or other census agglomeration is allocated to the size group of the whole urbanized core.

Rural farm population: Includes the population living in dwellings situated on a farm in rural areas. A farm, for census purposes, is an agricultural holding of one or more acres with sales of agricultural products of \$50 or more in the previous year. All persons living on such holdings in rural areas are classed as "rural farm" regardless of their occupation. Thus the population living on "census-farms" would include some persons not connected with farming operations and who derive their income from non-agricultural pursuits. Conversely, it would exclude those farm operators and their families who do not live on their farm holdings (e.g. in a neighbouring town or village).

The 1971 Census figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports.

(See inside back cover for additional information.)

Ce bulletin présente les chiffres définitifs de population, au recensement de 1971, selon la langue maternelle et le sexe. La langue maternelle est définie comme étant la première langue apprise et encore comprise. Dans le cas des enfants en bas âge, c'est la langue la plus souvent parlée à la maison.

Le tableau 17 présente des comparaisons chronologiques remontant à 1941 pour l'ensemble du Canada. Toutes les langues maternelles pour lesquelles il est possible de tirer des chiffres distincts du recensement de 1971 sont données pour le Canada et les provinces au tableau 18. Les autres tableaux présentent un classement moins détaillé pour d'autres genres de secteurs: régions urbaines et rurales, divisions de recensement, municipalités de 10,000 habitants et plus, régions métropolitaines de recensement, et autres agglomérations de recensement de 25,000 habitants et plus.

Des classements de la population en trois grands groupes, selon la langue maternelle (anglais, français et autres), seront publiés pour toutes les subdivisions municipales et les circonscriptions électorales fédérales dans un bulletin spécial, SP-3 (n° 92-773 au catalogue). Ce bulletin indiquera les municipalités et les circonscriptions électorales où le groupe linguistique minoritaire représente 10 % ou plus de la population totale en 1971.

Voici la définition, aux fins du recensement, des termes géographiques utilisés ici:

Régions urbaines: Comprend la population vivant dans: 1) les cités, villes et villages constitués de 1,000 habitants et plus; 2) les localités non constituées de 1,000 habitants et plus et ayant une densité de population d'au moins 1,000 habitants au mille carré; 3) les banlieues bâties de 1) et 2) ayant une population minimum de 1,000 habitants et une densité d'au moins 1,000 habitants au mille carré.

Régions rurales: Comprend tout le reste de la population.

Régions urbaines par groupe de taille: Chaque municipalité urbaine mentionnée à 1) et 2) ci-dessus est classée selon le groupe de taille de sa population. Toutefois, chaque municipalité (ou partie de municipalité) constituant le noyau urbanisé d'une région métropolitaine de recensement ou d'une autre agglomération de recensement est classée dans le groupe de taille de l'ensemble du noyau urbanisé.

Population rurale agricole: Comprend la population vivant dans des logements situés dans des fermes dans des régions rurales. Aux fins du recensement, une ferme est une exploitation agricole d'une acre ou plus ayant vendu pour \$50 ou plus de produits agricoles au cours de l'année précédente. Toutes les personnes vivant dans une de ces exploitations situées dans une région rurale sont classées sous la rubrique "régions rurales agricoles", quelle que soit leur profession. La population des "fermes de recensement" comprend donc certaines personnes qui n'ont rien à voir avec l'exploitation agricole et qui tirent leur revenu de l'exercice d'activités non agricoles. En contrepartie, les exploitants agricoles et leur famille qui n'habitent pas leur exploitation agricole (par ex., ceux qui habitent une localité voisine) ne sont pas pris en compte.

Par souci de confidentialité, les chiffres de 1971 publiés ici ont été soumis à une formule qui garantit l'impossibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités, des tableaux (y compris tous les totaux) sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De même, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences.

(Voir à l'intérieur de la couverture arrière pour d'autres renseignements.)

MEASURES OF RELIABILITY

The estimates of the mean square error (MSE) given in this report for the stated sets of characteristics include errors due to such things as response, processing and (where applicable) sampling errors, but do not include coverage errors. These estimates of reliability are published in order to give an indication of the level of error only and are not meant for use in hypothesis testing or detailed analysis. Moreover, the error estimates are primarily applicable to single characteristics. If reliability estimates are required for cross-tabulated characteristics, from these and other sets, the largest mean square error for the characteristics included in the cross-classification should be used.

The estimates of reliability given in the tables are the square root of the mean square error (or root mean square error). When using these figures, the user can be reasonably certain that, for the enumerated population, the true value lies within plus or minus twice the root mean square error (e.g., for a figure of 100 the range would be 100 ± 18.8) and virtually certain that it lies within plus or minus three times the root mean square error (e.g., for the same figure of 100 the range would be 100 ± 28.2).

MESURES DE FIABILITÉ

Les estimations de l'erreur quadratique moyenne (E.Q.M.) données ici pour ces ensembles de caractéristiques peuvent être entachées d'erreurs de réponse, d'exploitation et (dans certains cas) d'échantillonnage, mais jamais d'erreurs d'observation. Ces estimations de fiabilité sont publiées dans le seul but de fournir une indication du niveau d'erreur; elles ne sont donc pas destinées à vérifier des hypothèses ni à servir dans une analyse détaillée. De plus, les erreurs d'estimation s'appliquent principalement à des caractéristiques isolées. S'il est nécessaire d'établir des estimations de fiabilité pour les caractéristiques qui doivent entrer dans des tableaux à entrées multiples (qu'elles proviennent de ces ensembles ou non), il faudra utiliser l'erreur quadratique moyenne la plus élevée pour les caractéristiques qui figurent dans le tableau.

Les estimations de fiabilité présentées dans les tableaux sont la racine carrée de l'erreur quadratique moyenne (écart quadratique moyen). L'utilisateur peut donc être raisonnablement sûr que, pour les personnes dénombrées lors du recensement, la vraie valeur se situera entre plus ou moins deux fois l'écart quadratique moyen (par ex., pour un chiffre donné de 100, la limite de fiabilité serait 100 ± 18.8); il peut être également presque certain que cette valeur se situera entre plus ou moins trois fois l'écart quadratique moyen (par ex., pour un chiffre donné de 100, la limite de fiabilité serait 100 ± 28.2).

Reliability Estimates for Mother Tongue

Publications of the Census of Canada, 1971

This report is one of the Volume Series of publications of the 1971 Censuses of Population, Housing and Agriculture. Altogether, there are some 225 reports in this series prepared in such a way that by removal of their covers the contents can be combined to form the materials comprising the 6 volumes and 25 separate volume parts in the entire series. A hard-covered binder, suitably titled, is included in the composite price to purchasers of the complete set of reports for any given volume part.

Catalogue of reports

A catalogue is available which describes the individual reports in the Volume Series of 1971 Census publications as well as reports in other series (i.e., Advance Series, Census Tract Series, and Special Series). The catalogue also includes a price list and an order form. A copy of this catalogue may be obtained from Publications Distribution, Statistics Canada, Ottawa K1A 0T6. For further information on census publications, address your inquiry to Information Division, Statistics Canada.

How to order reports

Orders for reports may be sent to Publications Distribution, Statistics Canada, Ottawa K1A 0T6, or to Publishing Division, Information Canada, Ottawa K1A 0S9. Enclose payment with your order in the form of a cheque or money order made payable to the Receiver General of Canada. If more convenient, census publications may be ordered from Information Canada bookstores in Halifax, Montreal, Ottawa, Toronto, Winnipeg, or Vancouver. For other details concerning deposit accounts, bulk orders, etc., contact Publications Distribution, Statistics Canada.

Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Division, Statistics Canada, Ottawa K1A 0T7.

Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. A standard User's Request Form on which to outline precise tabulation requirements and to request time and cost estimates may be obtained from the User Inquiry Service of the Census Division of Statistics Canada.

Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Division of Statistics Canada.

Publications du recensement du Canada de 1971

Le présent bulletin fait partie de la série des volumes des recensements de la population, du logement et de l'agriculture de 1971. Cette série compte au total environ 225 bulletins présentés de telle sorte qu'en retirant leur couverture l'utilisateur peut les réunir et constituer ainsi les 6 volumes de la série, qui comprennent 25 parties distinctes. Un auto-relieur à couverture rigide portant le titre approprié est compris dans le prix d'achat de la série complète des bulletins constituant une partie de volume.

Catalogue

On peut se procurer un catalogue qui décrit chaque bulletin de la série des volumes du recensement de 1971, ainsi que les bulletins des autres séries (série préliminaire, série des secteurs de recensement et série spéciale). Le catalogue contient également une liste de prix et une formule de commande. On peut obtenir un exemplaire de ce catalogue en s'adressant à la Distribution des publications, Statistique Canada, Ottawa K1A 0T6. Pour tout renseignement complémentaire sur les publications du recensement, s'adresser à la Division de l'information de Statistique Canada.

Commandes de bulletins

Les commandes de bulletins peuvent être envoyées à la Distribution des publications, Statistique Canada, Ottawa K1A 0T6, ou à la Division de l'édition, Information Canada, Ottawa K1A 0S9. Toute commande doit être accompagnée d'un chèque ou d'un mandat établi à l'ordre du Receveur général du Canada. On peut aussi commander les publications du recensement aux librairies d'Information Canada de Halifax, de Montréal, d'Ottawa, de Toronto, de Winnipeg et de Vancouver. Pour plus de détails sur les comptes de dépôt, les commandes en gros, etc., s'adresser à la Distribution des publications, Statistique Canada.

Autres formes de publication

En plus des diverses publications contenant les résultats du recensement de 1971, de nombreux tableaux seront mis à la disposition des utilisateurs sous forme d'états mécanographiés. Ces tableaux seront également disponibles en microcopie. Les utilisateurs désireux de faire des analyses par des moyens mécanographiques pourront également se procurer un large éventail de tableaux statistiques sur bandes "sommaires". Pour tout renseignement sur le contenu, le prix et la disponibilité des résultats du recensement sur ces supports, s'adresser au Service-utilisateurs, Division du recensement, Statistique Canada, Ottawa K1A 0T7.

Totalisations spéciales

Dans la mesure où le respect du secret des données le permettra, Statistique Canada établira, à l'intention des utilisateurs qui en acquitteront les frais, des totalisations spéciales qui ne font pas encore partie du programme d'exploitation prévu. On peut obtenir auprès du Service-utilisateurs de la Division du recensement de Statistique Canada une formule normalisée sur laquelle l'utilisateur précisera ses besoins et demandera une estimation du délai et du prix.

Cartes et fichiers géographiques

Les utilisateurs pourront se procurer des cartes à grande échelle indiquant les limites des secteurs de dénombrement (c.-à-d. des territoires recensés par chaque représentant du recensement) ainsi que des cartes à petite échelle des divisions de recensement et des autres secteurs statistiques. Les documents constituant les fichiers géographiques (noms, codes, etc. géographiques) sont disponibles sous forme de tableaux présentant les différents secteurs de dénombrement qui constituent les unités administratives et statistiques (par ex., villes, villages, municipalités et secteurs de recensement). Pour plus de détails et pour une indication des frais, s'adresser au Service-utilisateurs de la Division du recensement de Statistique Canada.
